

Master of Chemistry Chemical Biology (Pharmacy)

The Master of Chemistry in Chemical Biology (Pharmacy) program has been recruiting graduate students since 2013. Combining new concepts of personalized drug development with cutting-edge frontiers in interdisciplinary chemical biology, the program aims to nurture technical and management talents for chemical and biomedical industries.

Research

The program relies on disciplines of Chemical Biology, Chemistry, Biology, Biomedical Engineering and others at Tsinghua Shenzhen International Graduate School (Tsinghua SIGS). Research platforms such as the State Key Laboratory of Cancer Chemistry Genomics, and the Shenzhen Bay Laboratory of Medical Technology and Engineering provide students with superior research resources. The program's international and interdisciplinary research environment also cultivates students who are innovative and creative.

Details

Students complete the program in 3 years. Those who meet all academic requirements will graduate with a Tsinghua University Master's Degree.

Faculty

Ma Lan, Chen Yuzong, Zhang Yaou, Wu Yaojiong, Jiang Yuyang, Huang Laiqiang, Sun Shuqing, Tan Chunyan, Xu Naihan, Tan Ying, Gao Dan, Xie Weidong, Liu Feng, Lin Jinshun
